

Daegu University

A University Where
Students are Happy

A University where Students are Happy

**DAEGU
UNIVERSITY**

Founding Sprit

Love Light Freedom

Daegu University was founded with a mandate to produce talented graduates who can help all people around the world to be happy based on the philosophies of the devotion to the welfare of all mankind as well as the school's founding principles - 'Love, Light, and Freedom'.

Educational Philosophy

To promote public welfare based on the philosophies of the devotion to the welfare of all mankind and the Christian Spirit.

University Mission

To cultivate creative human beings who aspire to actualize public welfare and contribute to social progress

Educational goals

- To create highly-skilled, creative, and proactive professionals
- To cultivate advanced human resources in national and social welfare
- To educate progressive and democratic citizens who will contribute to the development of society

University Motto

Foster Great Ambition

A University Where Students are Happy

60th Anniversary Motto

Building the future with our students, Building the world with our community

60 Years of History, 60 Years of New Prosperity

Greetings

A university where students are happy

You are invited to the future of Daegu University.

Daegu University is a beautiful university which has achieved remarkable development and achievements based on its founding principles of love, light, and freedom.

Daegu University, for the last 55 years since its foundation, has produced talented graduates who contribute to national development based on their humanity toward public welfare to consider and respect minority neighbors, their passion to break through crisis and hardship, and their enterprising spirit to create new history. In the future, Daegu University will devote itself as a renowned and prestigious private institute to produce the 21st century's advanced talents who will bring glory locally, nationally, and internationally.

Daegu University loves and respects its students. It also strives to be responsible for students' future happiness with its advancing education, career, and research supporting systems. <A University where Students are Happy> This is the new vision and paradigm that Daegu University is pioneering for Korea's university education.

This does not limit the meaning at strengthening its service for students. This means the fundamental innovation of university management paradigm and at the same time is a pledge of its willpower to lead the transition of paradigm in Korea's university education. We will continuously upgrade our paradigm of student-centered university management until our cherished students agree that we are providing the nation's best support service in all aspects including helping students to embrace cultures as 21st-century leaders, assisting students to train major-related skills, providing living and learning conveniences, and supporting students' preparations for employment.

<A University where Student are Happy> Daegu University will make students' dreams and ideals come true. Draw your beautiful and promising future delightfully here at Daegu University. Please plan and prepare your happy future with Daegu University.

Thank you.

President
Daegu University
Hong, Duckryul

Daegu University, Korea's first higher educational institute for special education, was founded in 1956 and included the fields of Special Education, Rehabilitation Science, and Social Welfare. Today, Daegu University is a comprehensive university with 13 colleges (95 majors), 7 graduate schools, and an enrollment of over 27,000 students.

At present, Daegu University is recognized not only as Korea's top university for Special Education, Rehabilitation Science, and Social Welfare, but also at the top in Information and Communication Technology, Industry-Academy Cooperation, and Continuing Education. In addition, it is becoming a dominant force in the fields of Design, Bio-industry, and the Automotive Parts Industry.

In order to pursue the internationalization of education, Daegu University has signed agreements with over 230 institutes around the world and is now actively implementing various programs such as joint research, and faculty and student exchanges. As an example of these internationalization efforts, approximately 1,000 students are invited or dispatched to Daegu University annually. In addition, approximately 550 international students from 59 countries are enrolled at Daegu University. To support these international students, Daegu University provides scholarships of between 30 and 100 percent of tuition and provides reasonably-priced dormitory accommodations for 100 percent of its international students.

- The most important discipline to maintain human life, we produce talents who will contribute to improving people's health.

Department of Food and Nutrition

- We produce talents who can respond quickly to the rapidly changing food environment and who can help fulfil people's nutritional needs.

Department of Biotechnology

- With the dream of extending human longevity, the future of science is moving with biotechnology at its center.

Department of Chemical Engineering

- With world-class research and development, we produce professional talents in high-tech chemical engineering fields.

Department of Landscape Architecture

- Comprehensive artistic science that creates landscapes, its demands are rapidly increasing due to urban development and industrialization.

COLLEGE OF INFORMATION AND COMMUNICATION ENGINEERING

- Selected as the best college in the 2001 Academic Section Assessment, selected for the 1999 Stage 1 Brain Korea 21 (BK 21) project and the 2006 Stage 2 BK 21 project
- Selected for the 2004 Embedded Industrial Manpower Training Project and POP-IT Manpower Training Project of the Local University Innovative Capacity Strengthening Project (NURI Project) administered by the Ministry of Education and Human Resources Development
- Secured world-class competitiveness in the IT field through inviting various IT-related national projects
- Implemented RFID/USB related research at the world-class Ubiquitous Technology Research Center (UTRC)
- Implemented the world-class Engineering Education Accreditation (ABEEK) program
- Producing talents required in the integration of rehabilitation-IT technology and the integration of medical treatment-IT technology in relation to state-of-the-art medical complexes
- Invited Xilinx Certified Accreditation Center in October 2009 and produced talents for the Field Programmable Gate Array (FPGA) of Xilinx Corp. that leads the Programmable Logic Device (PLD) market in the semiconductor industry field
- Invited and operating the APP Center to produce content development specialists who can utilize smartphone technologies

MAJORS

School of Electronic and Electrical Engineering

Electronic Engineering Major / Electronic Control Engineering Major

- We produce core human resources who can lead the 21st century's knowledge-based society.

School of Computer & Communication Engineering

Communication Engineering Major / Multimedia Engineering Major / Embedded System Engineering Major

- We produce sensitive technicians who can lead the information and communication industry.

School of Computer & Information Technology

Computer Engineering Major / Information Engineering Major

- Computers that lead South Korea - the global IT powerhouse! The heart of computer and IT talent production!

Campus views 7

COLLEGE OF LIFE & ENVIRONMENTAL SCIENCE

- Producing professionals in the promising 21st-century industries of biotechnology (BT) and environmentally-friendly technology industry (ET)
- Accomplishing excellent research achievements and increasing educational quality through expanding outstanding faculties and state-of-the-art experiment, practice, and educational supplementary materials
- Producing useful materials and establishing biological resource production systems through strengthening hands-on education utilizing a 3.3-million square meter training site, establishing ecological academeical forests and specialized botanical gardens, engaging in molecular farming, and operating practical curricula through various environmental-friendly projects such as expanding animal breeding and management coordinators and constructing life and environment museums

MAJORS

Department of Horticulture

- Technicians who lead the future of flowers and plants, we produce talents who even hold artistic sensitivity.

Devison of Life & Environmental Science

Bioindustry Major

- High value-added bio-industries that are required in the future, we lead the 21st century's new paradigm.

Food & Environmental Safety Science Major

- Future agriculture that adapts state-of-the-art science, we raise Korea's agricultural competitiveness.

Department of Animal Resources

- We produce professional leaders who will lead the future of animal resources.

Department of Forest Resources

- We produce professional leaders in the interest of national forest welfare where humans and forests harmonize.

Campus views 8

COLLEGE OF ARTS AND DESIGN

- Selected as an excellent college in the Design Field Assessment, selected for IT major and non-IT major support projects
- Selected as the central university for design projects in the Local University Innovative Capacity Strengthening Project (NURI Project) administered by the Ministry of Education and Human Resources Development
- Specialized curricula strengthened by hands-on practical programs and systematic and intensive instruction by supervising professors
- Experiencing advanced cultures through internship programs that enable students to experience domestic and international advanced designs and observations in the overseas academic fairs as well as major exhibitions
- Implementing special lectures by practical design specialists, operating practical design projects sponsored by local small and medium-sized enterprises under industrial/academic collaboration, and implementing joint industry and academy local community contribution programs (e.g. establishment of the Haitai Children's Art Gallery)

MAJORS

Department of Paintings

- We produce professional artists who will reach new artistic heights with creative imagination.

Programs for International Students

KOREAN LANGUAGE EDUCATION CENTER

Daegu University's Korean Language Education Center provides international students and overseas Koreans with opportunities to learn the Korean language as well as Korean culture. The Korean Language Program is designed to maximize the effects of Korean language acquisition and Korean culture understanding through integrated Korean language training in speaking, listening, reading, and writing as well as a variety of Korean customs and cultural experiences.

· Korean Language Program

- The KLP is offered through four regular sessions and two short-term sessions. Each session features four hours of classes per day, five days a week from Monday to Friday.
- Since 2006 Daegu University have implemented TOPIK (Test of Proficiency in Korean) as the government certified institution.
- Daegu University runs King Sejong Institute in Cambodia and founded Korean Language Education Center in China, Mogolia and Vietnam.

· Cultural Program

- Culture classes such as Korean song class, Korean movie class, Korean cooking class or Korean traditional craftwork class will be held every week.
- Field trips such as Korean historic site visits, folk village visits or ancient palace visits will be held every five weeks.
- International Student Event such as Spring Festival Food Fair, Korean Movie Nights, International Student Talent Contest, Korean Language Speech Contest will be help in each semester.

INTERNATIONAL STUDENT SUPPORT CENTER

The International Student Support Center provides arrival and departure assistance to international students at Daegu University. It also operates several other international student support programs and hosts a variety of events for international students.

· Arrival and Departure Assistance

This service offers international students help with their arrival to and departure from Daegu University in order to reduce the burden associated with living and studying abroad.

- Pick-up service on students' arrival
- Third party application service for alien card registration, visa-status change, and visa extension

· International Student Support Program

Daegu University provides the following special support programs for international students:

- Buddy Program

This program partners international students with Korean students one on one at least once a week. This program helps international students learn Korean language and expand their understanding of the Korean ethos and culture.

- Career Development Program

Daegu University operates a customized career development program for international students each semester. This program teaches international students the required skills to find a job in Korea including how to write resumes and cover letters, how to take interviews, and how to dress for success.

· International Student Counseling Center

Daegu University operates the International Student Counseling Center in order to assist students with problems they may encounter. The center strives to help international students overcome their concerns and difficulties in times of trouble.

· International Student Event Support

Daegu University hosts the following events to increase international students' enjoyment of their life at DU:

- Spring Festival Food Fair
- Korean Movie Nights
- International Student Talent Contest
- Korean Language Speech Contest

ACCOMMODATION

· ON-CAMPUS HOUSING

Daegu University offers reasonably-priced dormitory accommodations for all international students wishing to stay on campus.

Daegu University has Biho dormitory facilities for 2,500 students. It also operates separate "International Houses" which can accommodate approximately 300 international students. Dormitory rooms are fully furnished and include free high-speed Internet access. There are also a host of other facilities available such as cafeterias, laundry rooms, a convenience store, a gym, table tennis facilities and more. Undergraduate students are generally accommodated in Biho Dormitory, Graduate students in International House #2, and Korean Language students in International House #1.
